NOTE: 11 inch has ten rivets.

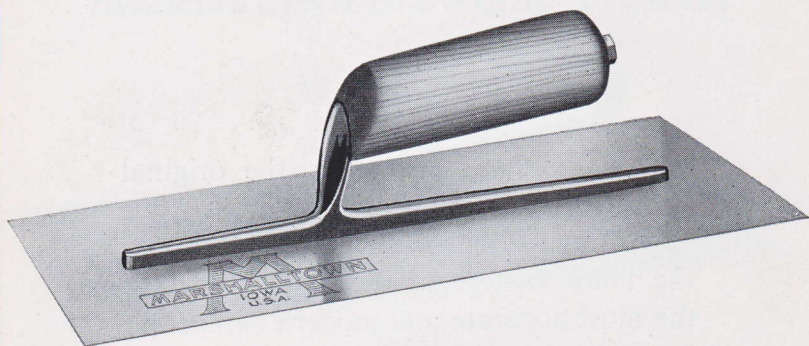

THE MARSHALLTOWN is the original high-grade plastering trowel. The design is our own. The use of only the finest materials, the employment of the most accurate and modern equipment for tempering, rigid adherence to the highest standard in workmanship throughout, properly shaping each trowel so it has the right balance, and finishing them as a high grade trowel should be finished—all these contribute to the universal popularity of MARSHALLTOWN trowels.

The MARSHALLTOWN trowel has made for itself an enviable reputation and is recognized by the trade and craftsmen alike as the leader.

This approval of our efforts is deeply appreciated.

MARSHALLTOWN brick trowels are made of a special grade of trowel steel and are extremely tough. The blade, post and tang are forged in one piece. Each trowel is carefully heat treated for maximum strength and toughness.

The blades are taper ground from heel to point on both sides—smithed by hand—and polished.

The posts are at right angles with the blades and the tangs are set for proper lift.

The handles are made of thoroughly seasoned extra hard-wood and are securely attached.

A variety of patterns are shown.

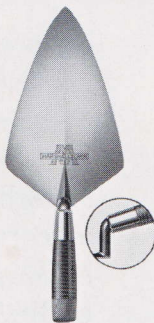

Skilled workmen with modern equipment at every step in the manufacturing, and careful inspection throughout insures the uniform dependable quality for which MARSHALLTOWN brick trowels are known.
